TRANSFER FACTS

- The University of Wisconsin – Platteville accepts the Associate in Arts and Science degrees from Northeast Iowa Community College. Transferring with these degrees will ensure students have met all university general education requirements with the exception of Ethnic and Gender Studies.

- All applications receive a comprehensive review. Academic preparation is the primary criteria used in the admissions review process. Transfer students are likely to be admitted if they have a cumulative grade point average (CGPA) of 2.00 or higher in college transfer courses and are in good standing at the institution they are currently attending or have attended.

- Applicants must have 12 or more transferable credits from an accredited institution to be considered for admission as a transfer. Applicants with fewer than 12 credits must meet new freshman admission requirements.

- Grades of “D” do transfer; however, some major and most engineering courses require a minimum grade of “C”. Students begin a new GPA upon admission to University of Wisconsin–Platteville.

- Students completing the AA/AS degree will have the foreign language requirement waived. Students transferring without the AA/AS degree will be required to complete two semesters of a single foreign language, unless they met the requirement by completing two or more years of high school foreign with a grade of “C” or better.

- Students are encouraged to apply early to ensure advance registration. For fall admission, students are encouraged to apply by January 1. For spring admission, students are encouraged to apply by September 1.

- Students admitted to the university must also have a score of 22 or higher on their math ACT or a grade of “C” or better in Calculus I (Math 2640) to gain admission into General Engineering. Students who do not meet this engineering standard will remain in “pre-engineering” until obtaining a “C” or better in Calculus I (Math 2640).

Notes:

1. Students must take BOTH MAT 210 and 216 to receive credit for Calc I and Calc II at UWP
2. CHEM 160/161 and 170/171 combine to equal CHEM 1450 Chemistry for Engineers at UWP
