Information Required by the Academic Information Technology Commission

7. The first set of questions refers to your program’s current use of information technology. The second set of questions refers to your program’s proposed future use of information technology.

Current Technology Information
a. What information technology is being used by your program? Please include library resources. For each tool that is used, please identify the objective of that tool and any barriers to achieving that objective. Please record your responses in Table 1 – Current Technology Index.

b. List any program/department policies regarding usage of the technology.
c. List any innovative uses of technology in your program/department.
d. What is the skill level of faculty and staff regarding the utilization of the technology used in your program/department?

Proposed Technology Information
e. What new information technologies are you piloting or would like to explore? For each tool, please answer the following questions.
   i. What is the learning or objective in using this technology?
   ii. What is the current skill level with this technology?
   iii. Why is this technology needed? For example, is it a replacement for something currently used or is it increasing learning objectives?
   iv. How does it fit into the strategic components (strategic plan, mission, values, etc.) of the University?
