Closing the loop in Graduate Programs

December 5, 2006

MSE/Counselor Education

- Added a new elective focusing on psychopathology and diagnosis for IA licensure as a professional counselor as a result of student needs and feedback about getting licensed in that state.
- Added rubrics for in-class presentations as a response to students wanting more concrete information ahead of time for guidance for presentations.
- Based on feedback from site-supervisors in the school practica, we've updated the evaluation forms used.
- Based on student input and the desire to move toward accreditation, Dr. Wheeler has written and submitted a Lab Mod Proposal to develop on-site counseling rooms, with one-way mirrors, for students to get more experience counseling others while still in the Tech's course.
