AAF Grant Report
Parker reviewed a project funded through the Assessment Activity Fund entitled “Assessing the Improvements to GE 1030”. Overall the results were encouraging with regards to rotating faculty from different fields of engineering through different sections of the GE 1030 course. Parker noted that there could be multiple reasons for the positive outcomes for students who experienced this course in a different format, but was confident that the new format did in fact play a part in those outcomes. Jadaan talked about the history of the course and why the changes were considered in the first place.
