From the Graduate Council meeting minutes of November 17, 2011: “Karen Stinson explained the need for a change in the educational administration licensure requirements. These changes were mandated by the licensure agency. Discussion ensued. Second reading for these course changes will be at the December 15, 2011 Graduate Council meeting.”

New course justification from submitted new course form: Elective course offering for students in the Mental Health track. Students in this track would benefit from special instruction in substance abuse and psychopharmacology to better serve their clients.

Catalog description from new course form: The course provides advanced levels of substance abuse counseling foci with emphasis on a strength-based perspective, including history and concepts of substance use and addiction, dependence, case formulation and assessment, developmental factors, diagnosis, biological interventions, treatment planning, and the complex interaction of culture and providing treatment for substance abuse.

From the minutes of the November 17, 2011 meeting: “Steve Benish presented and answered questions. He had a one sheet handout – missing page from syllabus. Steve went over the history and background for this course creation. Course is needed to cover licensure changes. Pat Bromley pointed out that Criminal Justice already has a psychopharmacology course and wondered if Steve had contacted them to check for overlap. Steve indicated he had not but would. Discussion ensued. Second reading for this course will be at the December 15, 2011 Graduate Council meeting.”

### 4. New slash course – first reading – BUSADMIN (Business Administration) 6160, Purchasing Management, 3 credits, effective fall 2012 – David Heimerdinger or Wendy Brooke.
Justification for new course (from the new course form) – this course will serve as one of the core courses for the Integrated Supply Chain Management Master’s program.

Catalog description and prerequisite (from the new course form) – This course focuses on the managerial, administrative, strategic and tactical aspects of the purchasing function. Emphasis will be placed on the pertinent issues in purchasing management for both goods and services business sectors. The course will explore the managerial perspective of the core tasks and challenges required to effectively manage the purchasing function within the context of an integrated supply chain. \( \text{P: BSAD 4100 or consent of instructor.} \)

Course will be offered both online and face to face.

5. Assessment report for Project Management – Bill Haskins.

   New course justification (from form): Project Management’s governing standards body, PMI, has developed a new credential related to agile methods. Agile methodology education is in high demand, and agile techniques are widely used, especially among practitioners who run smaller projects that don’t require the extensive document trail used in traditional project management.

   Catalog description and prerequisites (from form): Starting with an overview of Agile project management methodologies and theory, this course prepares students to evaluate projects, assess culture, and adapt agile methods to project management applications within the organization. Though some content is drawn from the software environment, this course is intended for a broad audience and is not specific to nor focused on software development. \( \text{P: Project Management 7010 and Project Management 7020 or consent of program director.} \)

7. For information only – course description change for ENGRG (Engineering) 7830, Advanced Cost and Value Analysis, effective spring 2012 – Jill Clough.

   Explanation for change (from form): ENGRG 7830 Advanced Cost and Value Analysis was revised to remove content duplicated in ENGRG 7860 Continuous Improvement with Lean Principles. First offering of the revised ENGRG 7830 is scheduled for spring 2012.

   New course description (from form): Introduction to cost estimating and value engineering: basic principles of accounting and forecasting; estimate assurance, decision making, and systems engineering for life-cycle costing. Applications of engineering valuation. Basic principles of function analysis. Discussion of current techniques in process value evaluation and improvement.

8. For information only – COUNSLED (Counselor Education) 7060, Practicum II: School Counseling – title change and credit change approved at the May 12, 2011 Graduate Council meeting – credits for 7060 were accidentally changed from 3-12 credits to 3-6 credits – 7060 should have only been a title change; not a credit change – credits should be 3-12 credits – Kimberly Tuescher.
