Questions for Gen Ed SLO Assessment

Instructions:
The following questions should be answered in a report sent to the Academic Standards Committee at the end of the semester. If a program has multiple courses that qualify for a single listed SLO, you may select a representative course to submit for that specific SLO. Reports need to be received for each SLO, i.e. if your program has courses that connect with SLO 1.1 and 1.5, a separate report must be submitted for SLO 1.1 and SLO 1.5 as the assessment data should be different.

Please make sure to answer all questions. If you have specific instructors complete questions one to four, please note that the fifth question likely cannot be answered by an individual instructor and should instead be answered by the Director or Chair.

Questions:
1. What was done to assess the SLO (use the latest assessment done for the SLO and course selected)?

2. Based on the assessment, what fraction of students met the outcome and what fraction of students were deemed highly proficient?

3. What changes, if any, do you envision making over the next three years to improve the assessment or to improve the student's ability to achieve the student learning objective? (Briefly explain the motivation for the proposed changes or the rationale for making no changes.)

4. How does the fraction of students meeting the general education SLO under consideration compare to the fraction of students passing the class? If significantly fewer students are meeting the SLO than passing the class, please propose one or two concrete steps that can be taken over the next three years to increase the number of students who are meeting the general education SLO.

5. All general education courses have four general education SLOs associated with them. The courses should be assessing these general education SLOs consistently (every semester or every year) regardless of the ASC's review rotation. Please identify the percentage of your program's general education courses that have assessments in place with data actively being collected for all general education SLOs connected to the course.
