Campus Planning Commission Minutes
2/11/05

Present:  Barnet, Compton, Stradford, Hagen, Soja, Bies, Stephens, Skrede, Palmer

1. Previous Minutes:  Approved with one change noted – Ulsvik is now planned to
be done Fall of 2007, with a start date of July 2006.
2. Stephens handed out Projects in Planning/Design/Construction, Project Request,
and 6-year enumerated project handouts and went over these.
   a. The commission members discussed that the commission does not have a
voice regarding the new projects – we are not being consulted at any
phase.
   b. It was mentioned that a program statement for Ulsvick has not been
released, so we do not know what that building will be used for.
   c. The last master plan was released in 1994 – a new one has not been
released, but many changes are planned for the campus.  The plan needs to
be released to obtain more input and make it better.
3. Stormwater management
   a. The city has decided not to develop a plan, but the UW system is
developing one.  A meeting regarding stormwater management is being
planned for May.
4. Update on new residence hall
   a. In pre-design now
   b. It will be 6 stories and hold 380 residents.
   c. There will not be room for Juniors and Seniors in the dorms if the TSI
proceeds as planned.
   d. Compton would like more landscape control for around the new buildings.
Palmer said that UW-P will do the landscaping.  Compton suggested that a
rain garden would be a nice idea for this area.
