• Vickie Dreessens reported that the flu numbers are way down this year. Not a positive case has yet been reported at Southwest Health Center. The Student Health Services successfully went through an audit this past fall. Various procedures were reviewed and through much work the audit was a success. The Family Planning Waiver looks like it will continue to be funded.

• Dierdre Dalsing reported that Peggy Hines was hired in a fulltime position and an LTE position was also added. With the added support students can get an appointment within a day or two. The University Counseling and Student Health Services were awarded an Opportunity Grant to fund the Respect program. The focus of the program will be “Students Promoting Respect” and it will run all year. The program will target freshman through various media.
