UUCC General Education Resolution
May 3, 2006

Whereas the results of the 2005 General Education Senior Exit Survey indicate a disconnect between the various student learning outcomes in general education and the students’ experiences, the University Undergraduate curriculum Commission:

1. Requires that all syllabi in courses that count for general education credit include the relevant student learning outcomes. (For example, all syllabi in courses that count for humanities credit must include the following. “Through their study of the humanities, students will: (1) understand some of the diverse approaches to questions of human meaning and value; (2) demonstrate competence in critical thinking, reading, and writing; (3) acquire tools for lifelong learning in the humanities.”)
2. Recommends that faculty and academic staff who teach courses that count for general education credit briefly explain, on the first day of class, the value of general education and the value of the relevant competency or liberal studies area.

Motion to accept resolution moved by P. Sealy. P. Young seconded. Motion passed.
d. Other – P. Hagen – Reminder: Noted that (UIEC) University International Education Committee received a grant to work on this summer regarding International aspects of the curriculum. They are looking for a few faculty to help compile this group which will be lead by the Teaching Excellence Center. Please apply!
