Now that I've completed my degree, I am using the knowledge I gained to help me be a better supervisor. It was definitely a wise investment in my future.
Engineering
Delivered 100% online, UW-Platteville’s Master of Science in Engineering develops skills in advanced mathematics, engineering management, technical communications, and computer applications. UW-Platteville has educated engineers for over 150 years and has earned a national reputation as a prestigious engineering institution.

You’ll start the program with core competency courses in mathematics, computer applications, engineering communications, and engineering management.

Then choose electives such as Design for Manufacturability, Continuous Improvement with Lean Principles, Digital Control Systems, Geosynthetics Engineering, and more from one of the technical emphasis areas relevant to your career goals: Engineering Design, Applications of Engineering Management, Control (Electrical) Systems, or Structural/Geotechnical Engineering.

Want to boost your career but not looking for a full master’s degree? Earn a 12-credit certificate in Engineering Management, Geotechnical Engineering, Structural/Geotechnical Engineering, or Engineering Design.

YOUR BEST CAREER MOVE.

✓ No GRE or GMAT
✓ No campus visits or residency
✓ Accredited by the Higher Learning Commission

The University of Wisconsin-Platteville is a regionally accredited state university offering 100% online programs that are consistently recognized for their quality and affordability by U.S. News & World Report, Super Scholar, and GetEducated.com, and for being a top Military Friendly school.
