1. Record all your final exams in your calendar.
   - The final exam schedule is on the Registrar’s web page:
     - [http://www.uwplatt.edu/registrar/finals-week-schedule](http://www.uwplatt.edu/registrar/finals-week-schedule)

2. Make a note in your calendar to reflect whether each final exam is “cumulative” or a unit exam
   - Ask your professor for clarification if you’re not sure

3. Start blocking out chunks of time in your calendar for studying.
   - Start studying today/tonight!
   - Be realistic about the ‘chunks’ of time (e.g. if you can realistically only study 30 minutes at a time, mark down several 30 minute time slots)
   - Include WHERE you will study
   - Include ‘what’ subject you will be studying

4. Adopt an interactive study approach (if you haven’t already done so)
   - Make note cards to quiz yourself on the information in your notes
   - REVIEW/read your notes often.
   - If the exam will include information in your book, be sure to review the chapters (to include answering any ‘review’ questions in the chapters)

5. Make daily ‘to-do’ lists to help you stay on track
   - In lieu of writing “study for Biology” chunk out the list into several tasks (e.g. Study Chapter 17 notes, Study/complete Chapter 17 review questions in the book, Study Chapter 17 homework)

Tips from your UW-Platteville Peers:

“Get plenty of sleep and take breaks!” Meaghan McGuire, Broadfield Science, Senior

“Make sure to spend more time on the subjects that you are struggling the most with. TAKE A DEEP BREATH! You will do great on the exam!” Katlyn Elsinger, Mechanical Engineering, Senior

“Start studying early to allow time to ask professors questions before finals arrive. Take study breaks so you can refocus and do not get to sick of studying. SLEEP!” Amber Holbrook, Criminal Justice, Senior

“Make sure to clarify what is going to be on the final. Some professors let you know what to be prepared for on the final and some might not, all depends on the professor.” Tasha Wagner, Industrial Engineering, Senior
