

New device helps keep PIONEERS SAFE

University Police and Facilities are working together to install barricade devices on University classrooms and labs throughout campus.

The device allows anyone inside of a classroom to quickly and easily barricade the door from within.

You'll see a wall-mounted clear box with a piece that can be removed and inserted into the floor, allowing anyone inside of a classroom to quickly and easily barricade the door from within.

The goal is to improve security and to provide you the tools you need to protect yourself – and others – in the event of an intruder.

Once a threat is over, the device can be easily removed from the inside. And should anyone barricade others inside of a room, all University Police are equipped with a tool that can remove the barricade from the outside.

Nightlock Lockdown Instructions

1 Remove device from case.

2 Position T-shaped edge over T-shaped groove on door.

3 Slide down until device locks into place.

If you have questions — or see an empty box — please alert University Police at 608-342-1584 or police@uwplatt.edu.
